**ASOSIASI
ILMUWAN DATA
INDONESIA**

Yellowfinbi.com

We love data.

We do. All kinds, from all sources. We understand that information contained in a business's data is where the next great idea will come from. New revenue streams, innovative product concepts, and ways to change the world usually start with a data point that sparks a thought. We delight in bringing those sparks to life.

Creating analytical experiences for 29,000+ companies world wide

Learning Objective

- To be familiar with Business Intelligence
- To understand the roles in data world
- To understand and familiar with the tools of Data Analytics
- To be familiar with Data Visualization
- Make Data Visualization with Yellowfin BI

Bagaimana Data, Teknologi dan Informasi Bekerja

Data

Menambahkan makna pada data

Informasi

Menemukan pola dalam informasi

Pengetahuan

Memahami dan Menerapkan Pengetahuan

Kebijaksanaan Insight

Memahami dasar pengetahuan dan esensi kebijakan

Peran Teknologi

Pengumpulan, Pengolahan, dan Analisis Data menjadi Pengetahuan

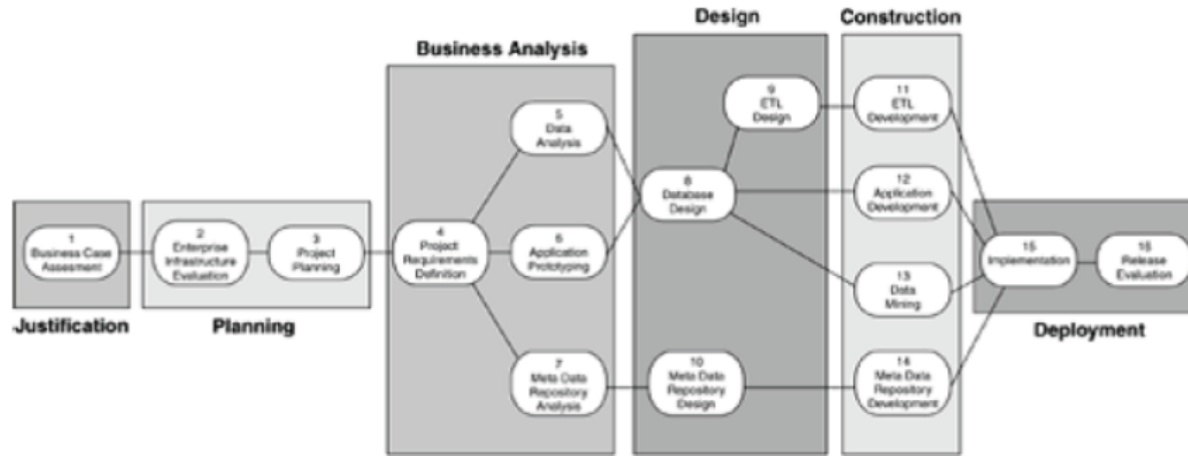

Pengambilan Keputusan

- Memahami masalah yang ingin diselesaikan
- Mengambil tindakan atau kebijakan berdasarkan wawasan yang di dapat

Business Intelligence

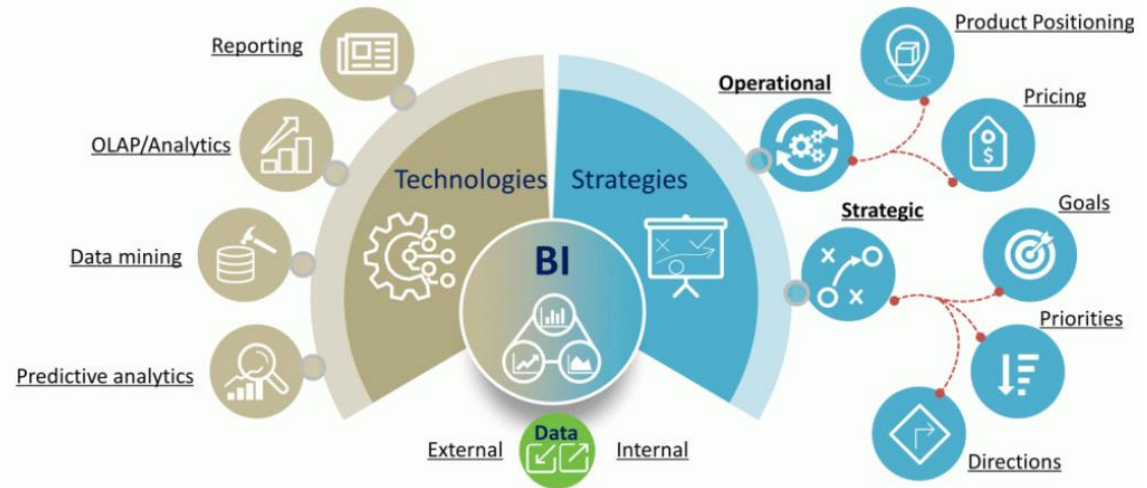

Sekumpulan teknik dan alat untuk mentransformasi dari data mentah menjadi informasi yang berguna dan bermakna untuk tujuan analisis bisnis.

Gambar 1. *Business Intelligence Development Step* (Larissa T. Moss, S. A., 2003:41)

What Business Intelligence actually is ?

Business intelligence (BI) terdiri dari strategi dan teknologi yang digunakan oleh perusahaan untuk analisis data informasi bisnis. Dengan bantuan penyimpanan data, teknologi gudang data, OLAP / Analytics, penggalian data, dan teknologi analisis prediktif, ini menggabungkan data internal dan data eksternal untuk menghasilkan keputusan operasional dan strategis. Keputusan operasional dapat berupa penentuan posisi dan harga produk, sedangkan keputusan strategis dapat menjadi tujuan akhir, prioritas utama, dan arah pengembangan.

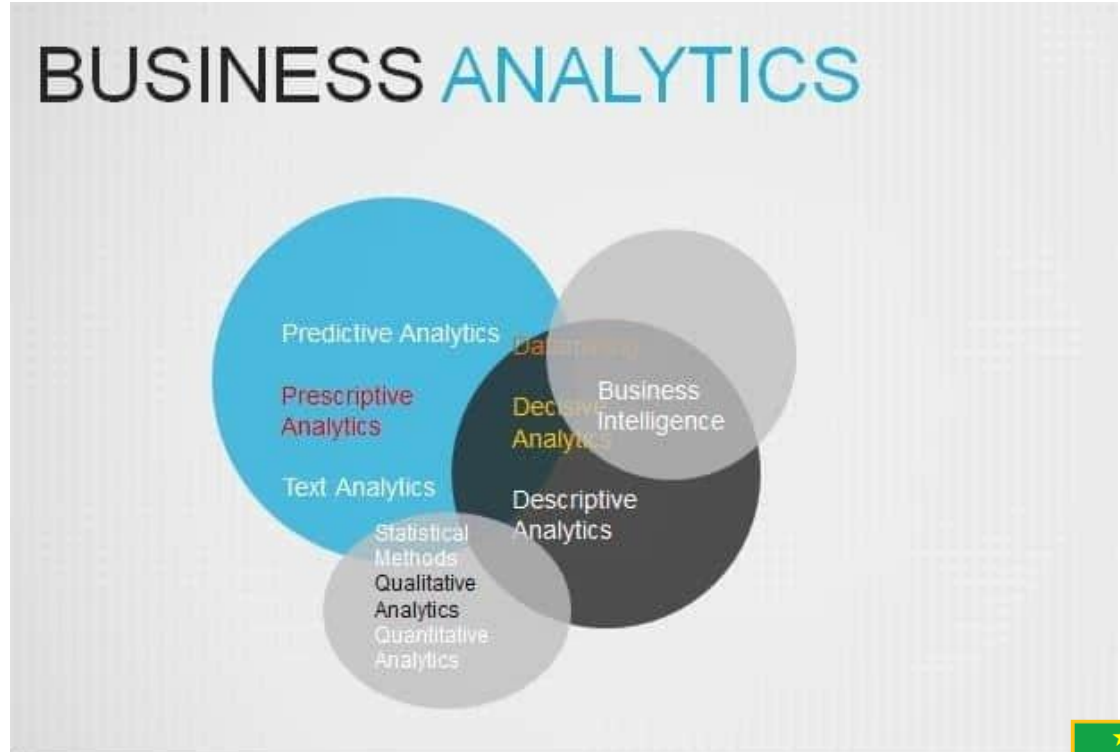

<https://yourfreetemplates.com/business-intelligence-infographic/>

Function of BI

Business Analytics

Business Analytic (BA), mengacu pada keterampilan, teknologi, praktik untuk iteratif terus menerus eksplorasi dan investigasi bisnis masa lalu kinerja untuk mendapatkan wawasan dan mendorong perencanaan bisnis.

Evolution of BI

Traditional

- Tabular Reports
- Broadcast & Scheduling
- Export to spreadsheets

Augmented

- Assisted Insights
- Automated Analysis
- Operationalise Data Science Models

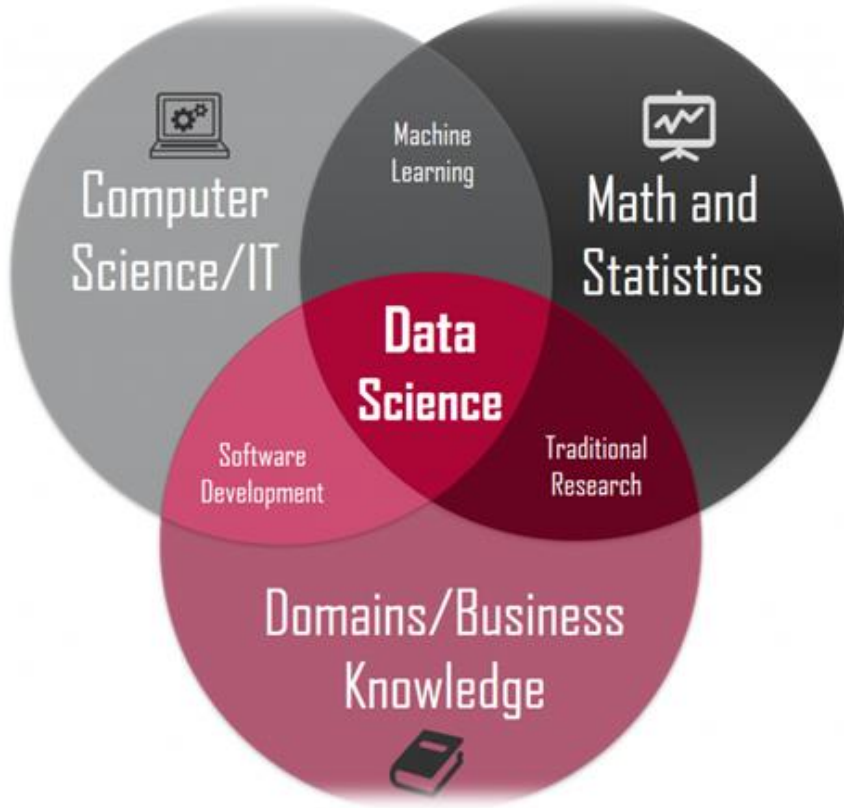

Modern

- Self-Service Data Discovery
- Actionable Dashboards

Collaborative

- Data Stories
- Management Decks

Data Science

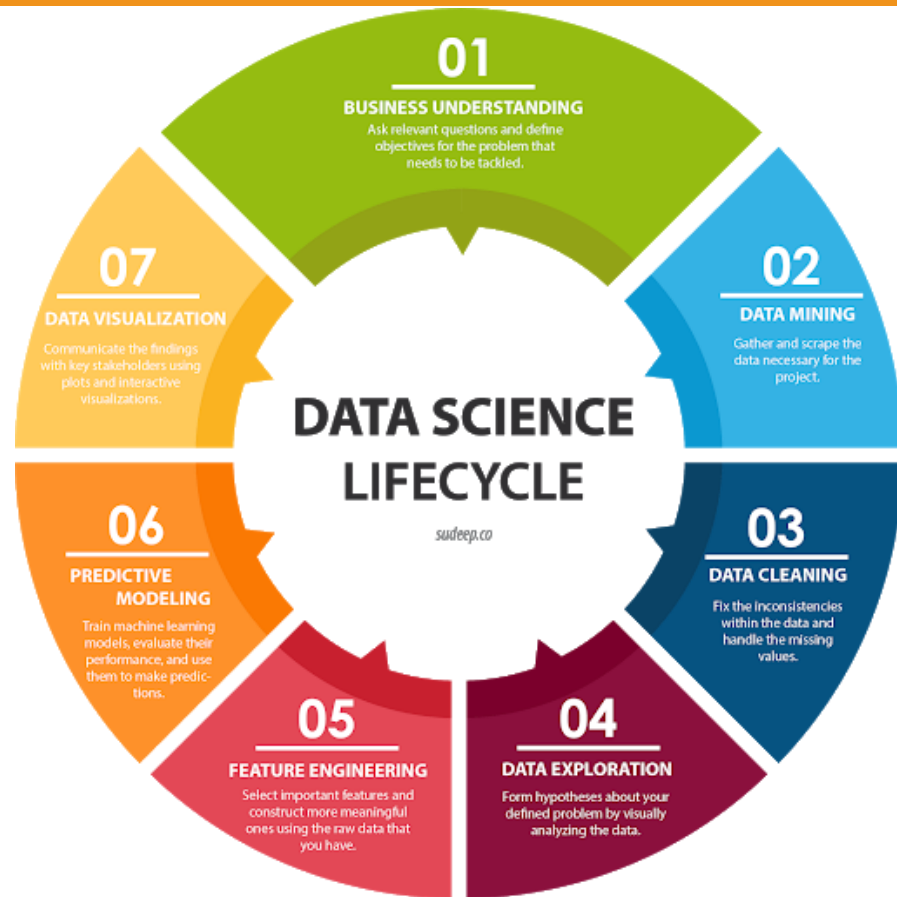

Data Science adalah bidang interdisipliner yang menggunakan metode, proses, algoritme, dan sistem ilmiah untuk mengekstrak pengetahuan dan wawasan dari banyak data struktural dan tidak terstruktur.

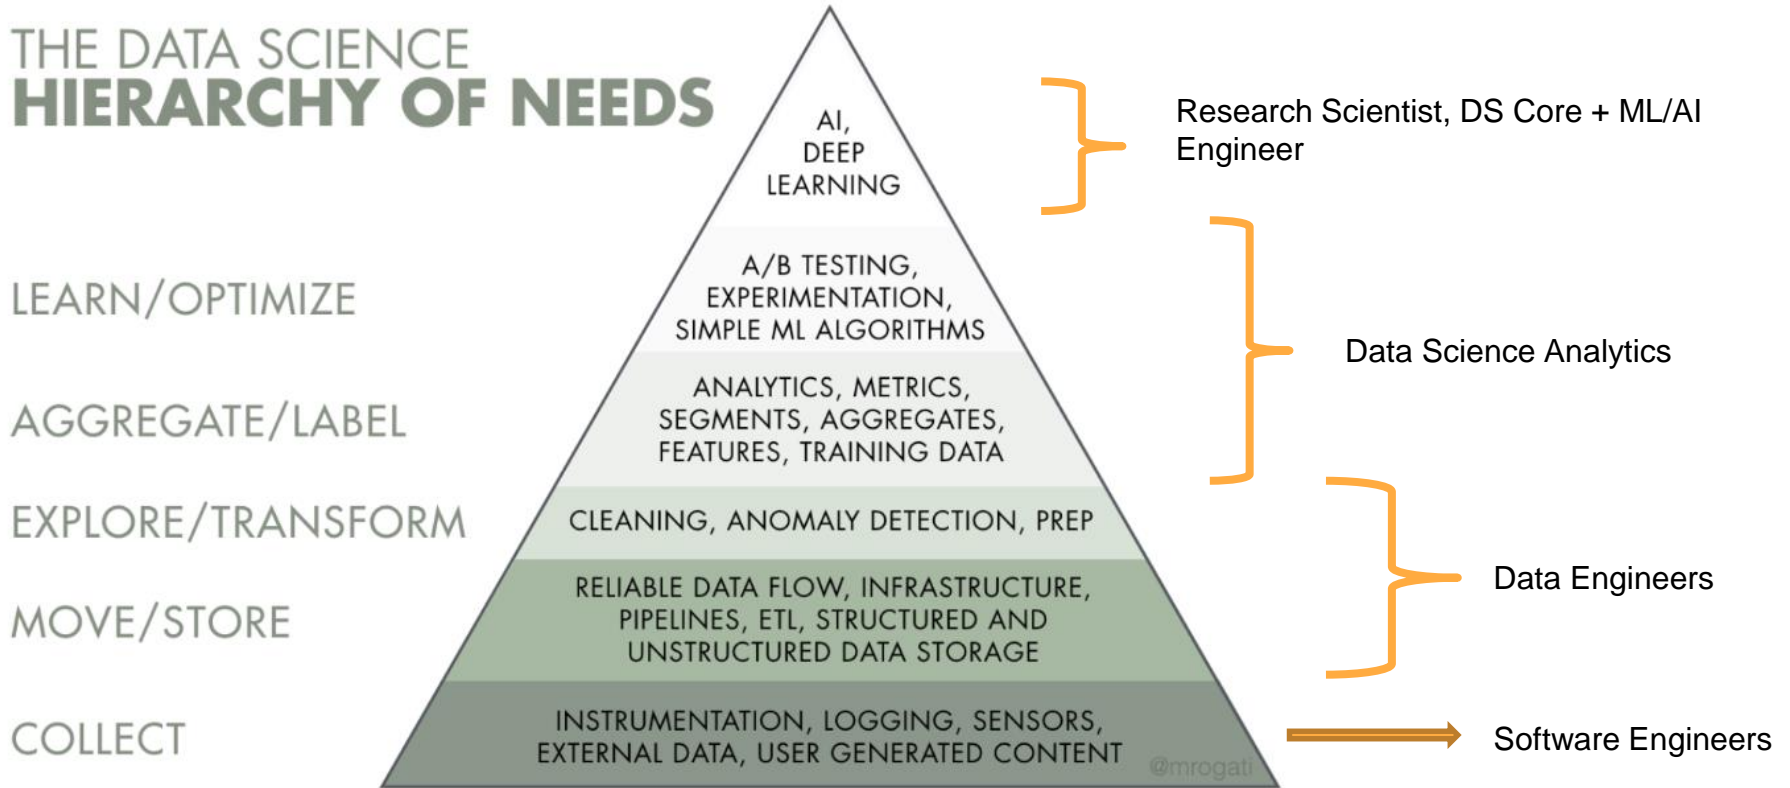

Data science is related to data mining and big data analytics.

Keywords : predictive, data products, business benefit, measurable metrics, actionable insights, big data.

Intro to Data Analytic

Data Analytics

is **science and techniques** of **analyzing raw data** in order **to make conclusions** about that information

Data Analytics

“Garbage in, garbage out”

Your analysis is as good as your data.

Data Visualization Intro

Give me insight from this

VS

Keuntungan Data Visualisasi

- Better Analysis
- Finding relationship in the data
- Understanding story behind the data

Source : dribbble.com

Prinsip data Visualisasi

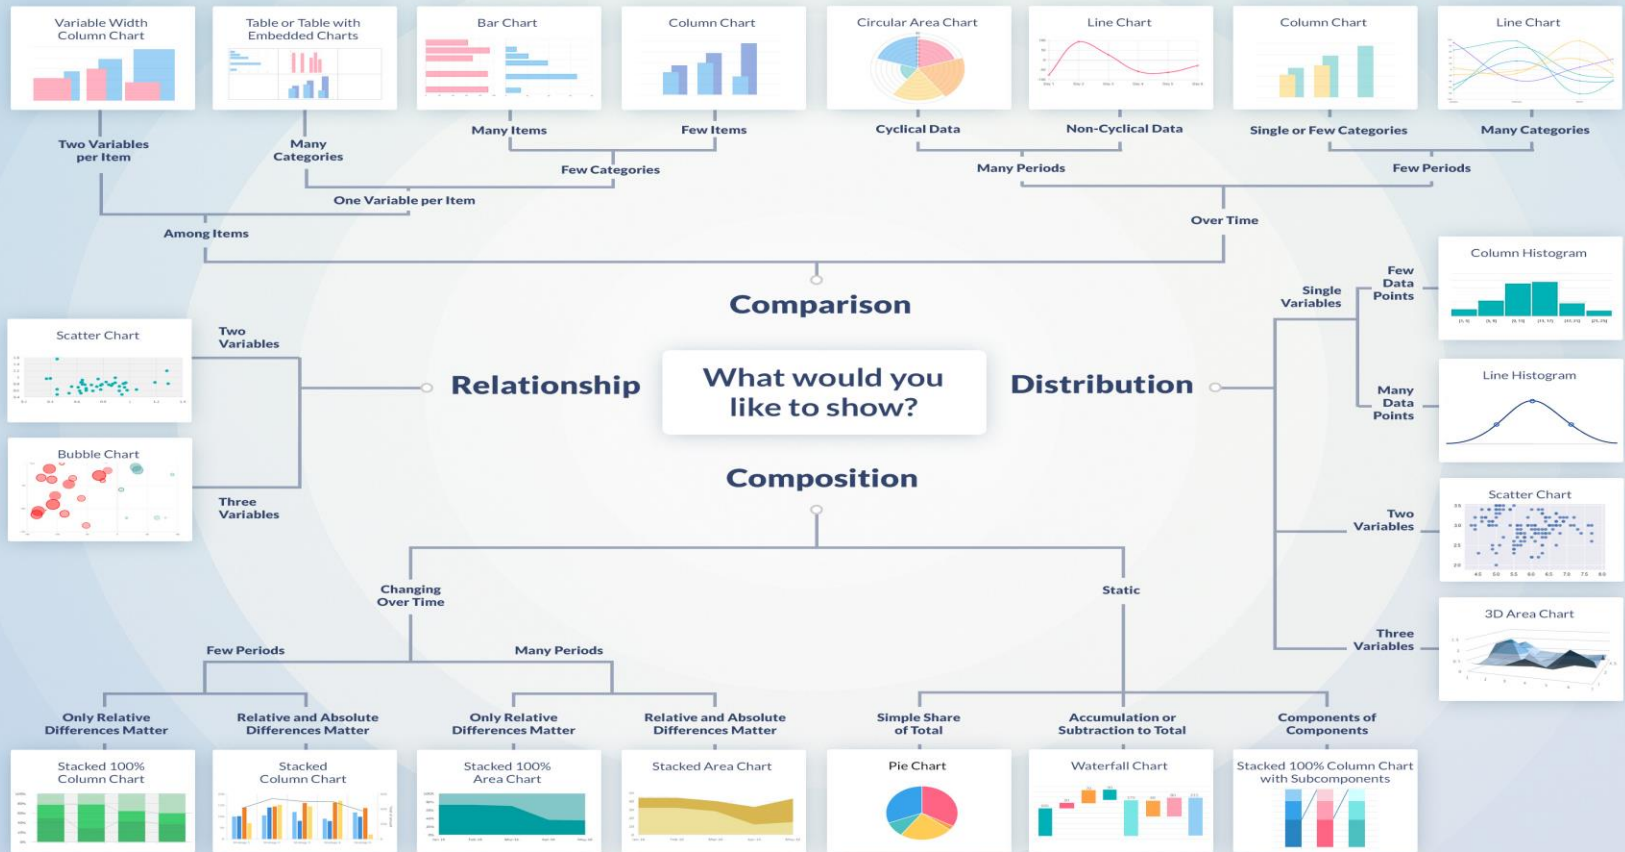

Intuitive, insightful and scalable

Sangat mudah bagi user baru untuk cepat memahami dan mengerti..

1. Design for audience
2. Refine the message
3. Arrange by priority
4. Instruct with titles and tooltips
5. Fix Size

Guided Visualizations for Charts and Graphs

Introduction to Yellowfin 9

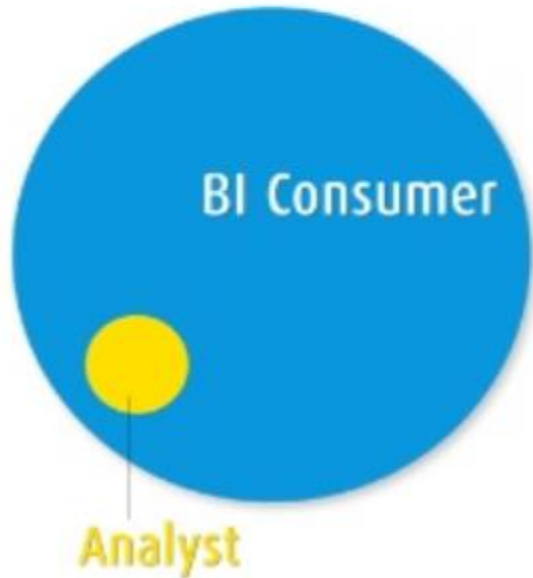

Creating analytical experiences for 29,000+ companies world wide

The **Yellowfin** Platform

Target Audience

BI For the BI Consumer

- Yellowfin is not just an Analyst tool
- Yellowfin provides non-technical business users with the ability to build interactive content
- People want software that's simple to use

Centralized Architecture

Yellowfin Data Preparation

New Connection ✕

Select your data source

- Database
- Cube
- JNDI
- CSV

Or choose a platform

- Reporting...
- Expensify
- Facebook...
- Google An...
- Google Sh...
- Instagram
- Json Data...

- Zendesk S...

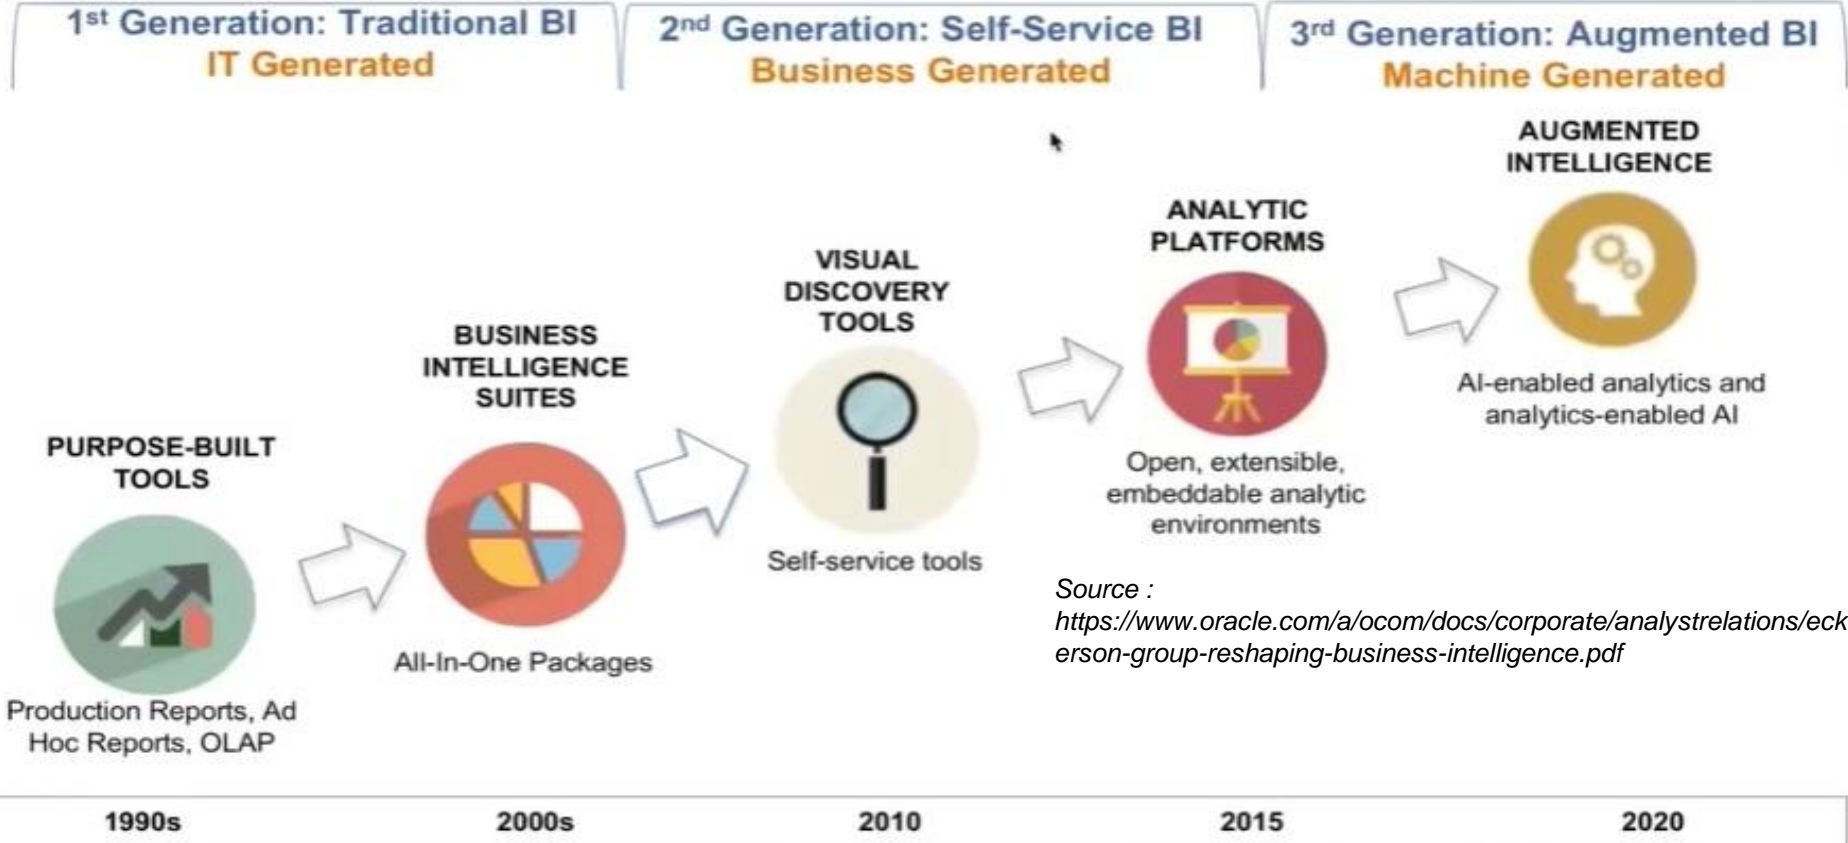

A screenshot of a data preparation tool interface. The top bar has 'Test' and 'Publish' buttons. Below that are tabs for 'Entity Relationships', 'View SQL', and 'View Data'. The main area shows a relationship diagram with several data sources connected by lines. The sources include:

- INTERNATIONALBANKRATE
- CAMPAIGN (fields: CAMPAIGNDESCRIPTION, CAMPAIGNID, MEDIACATEGORY, TARGETDEMOGRAPHIC)
- TRAVELAGENCY (fields: AGENCYDEMOGRAPHIC, AGENCYDESCRIPTION, AGENCYID, AGENCYNAME, AGENCYREGION, AGENCYTYPE, ISOCODE)
- ATHLETEFACT (fields: AGEATCAMP, AGEGROUPATCAMP, AGENCYID, BOOKINGCURRENCY, BOOKINGMETHOD, BOOKINGSTEP, CAMPAIGNID, CAMPID, CAMPLength, CAMPRATING, CANCELLATIONFEE, COST, DEMOGRAPHIC, ENDDATE, INVOICEDAMOUNT, INVOICEDATE, INVOICEESTIMATE, PERSONID, STARTDATE, STATUS)
- CAMP
- PERSON
- DATELOOKUP
- BONEBREAKS
- ATHLETEID

The diagram shows relationships between these entities, with lines indicating foreign key or data flow connections.
